

# ASSIGNMENT – 1

By Naveen , BCA 1<sup>st</sup> sem

Question.1 - To accept student details and display them .

Answer.1 – Program :

```
/* Here is a program to accept student details and display them
```

```
</> Naveen
```

Date: 19 oct 2021

```
*/
```

```
#include<stdio.h>
```

```
#include<conio.h>
```

```
void main()
```

```
{
```

```
    //Header
```

```
    printf("\n\t Program to accept student details from user");
```

```
    printf("\n\t*****");
```

```
    // Declaring variable
```

```
    char FNAME[20], SNAME[20], FFNAME[20], FSNAME[20];
```

```
    long long CNUM,FCNUM;
```

```
    //Taking input from user
```

```
    printf("\n\t Enter Student Name : ");
```

```
    scanf("%s %s",&FNAME,&SNAME);
```

```
    printf("\n\t Enter Student Contact Number :");
```

```
    scanf("%lld",&CNUM);
```

```
    printf("\n\t Enter student Father name :");
```

```
    scanf("%s %s",FFNAME,FSNAME);
```

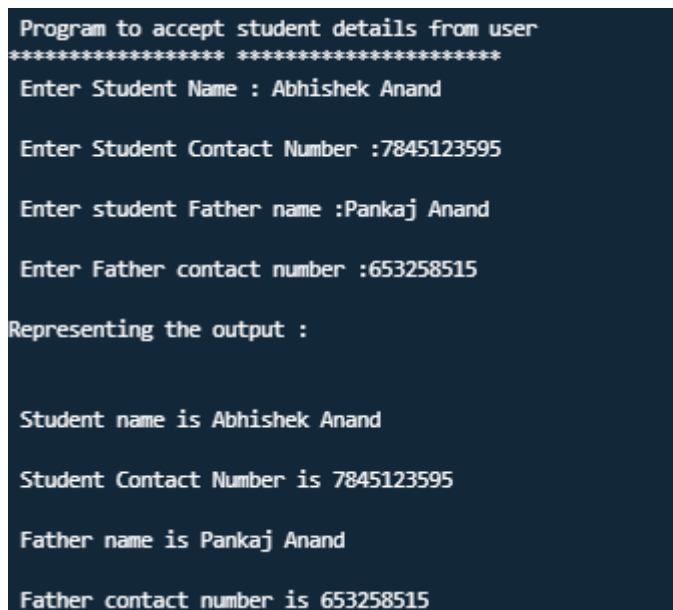

```
    printf("\n\t Enter Father contact number :");
```

```
    scanf("%lld",&FCNUM);
```

## ASSIGNMENT – 1

```
printf("\n\tRepresenting the output : \n\n");
printf("\n\t Student name is %s %s \n",FNAME,SNAME );
printf("\n\t Student Contact Number is %lld \n",CNUM);
printf("\n\t Father name is %s %s \n",FFNAME,FSNAME);
printf("\n\t Father contact number is %lld \n",FCNUM);
}
```

OUTPUT :

```
Program to accept student details from user
*****
Enter Student Name : Abhishek Anand

Enter Student Contact Number :7845123595

Enter student Father name :Pankaj Anand

Enter Father contact number :653258515

Representing the output :

Student name is Abhishek Anand

Student Contact Number is 7845123595

Father name is Pankaj Anand

Father contact number is 653258515
```

Question 2.- To find simple interest

Answer 2.- Program :

/\* Here is a program to find simple interest

</> Naveen

Date: 19 oct 2021 \*/

```
#include<stdio.h>
```

```
#include<conio.h>
```

```
//Defining values
```

```
#define INTEREST 0.1
```

```
int main()
```

```
{
```

```
    //Header
```

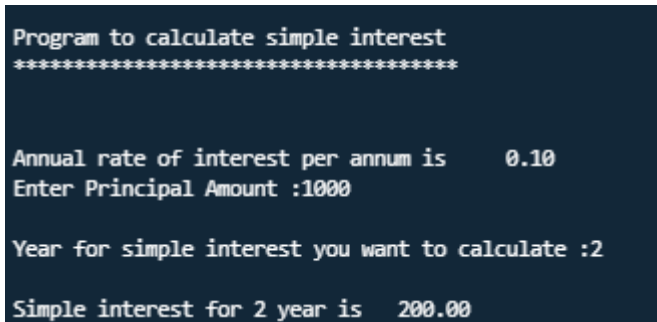

```
    printf("\n\t Program to calculate simple interest");
```

```
    printf("\n\t *****\n\n");
```

## ASSIGNMENT – 1

```
//Declaring Variables
int p_amount,year;
float SI;
//Prompt user to take input
printf("\n\t Annual rate of interest per annum is %8.2f",INTEREST);
printf("\n\t Enter Principal Amount :");
scanf("%d",&p_amount);
printf("\n\t Year for simple interest you want to calculate :");
scanf("%d",&year);
//Simple interest formula
SI=p_amount*INTEREST*year;
//output
printf("\n\t Simple interest for %d year is %8.2f",year,SI);
}
```

### OUTPUT :

```
Program to calculate simple interest
*****

Annual rate of interest per annum is    0.10
Enter Principal Amount :1000

Year for simple interest you want to calculate :2

Simple interest for 2 year is  200.00
```

### Question.3 – To find sum of two numbers.

Answers.3 – Program :

/\* Here is a program to add two numbers

</> Naveen

Date: 19 oct 2021 \*/

```
#include<stdio.h>
```

```
#include<conio.h>
```

```
int main()
```

```
{
```

```
    //header
```

```
    printf("\n\t Program to add numbers + ");
```

```
    printf("\n\t *****");
```

```
    //declaring variable
```

```
    int num1,num2,sum;
```

```
    //prompt user to give input
```

```
    printf("\n\tEnter First Number :");
```

```
    scanf("%d",&num1);
```

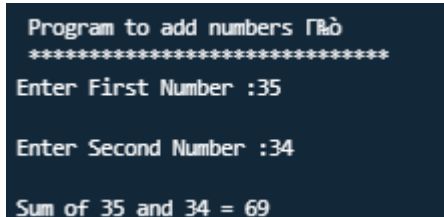

```
    printf("\n\tEnter Second Number :");
```

```
    scanf("%d",&num2);
```

## ASSIGNMENT – 1

```
//Calculations
sum=num1+num2;
//Printing output
printf("\n\tSum of %d and %d = %d",num1,num2,sum);
}
```

OUTPUT :

```
Program to add numbers \n\tSum of 35 and 34 = 69
```

Question 4 -To find product of three numbers.

Answer 4- Program :

/\* Here is a program to find product of three numbers

</> Naveen

Date: 19 oct 2021 \*/

#include<stdio.h>

#include<conio.h>

```
int main()
{
    //Header
    printf("\n\tHere is program to find product of three numbers \n\t");
    printf("\n\t*****");
    //Declaring variable
    int num1,num2,num3,product;
    //Prompt the user to give input
    printf("\n\t Enter 1st number :");
    scanf("%d",&num1);
    printf("\n\t Enter 2nd number :");
    scanf("%d",&num2);
    printf("\n\t Enter 3rd number :");
    scanf("%d",&num3);
    //Calculations
    product=num1*num2*num3;
    //Giving output
    printf("\n\tProduct of %d,%d,%d is %d",num1,num2,num3,product);
}
```

OUTPUT :

## ASSIGNMENT – 1

```
Here is program to find product of three numbers
*****
Enter 1st number :25

Enter 2nd number :4

Enter 3rd number :10

Product of 25,4,10 is 1000
```

### Question 5- To find average of marks scored in 5 subjects

Answers5 – Program :

/\* Here is a program to find average of marks scored in 5 subjects

</> Naveen

Date: 19 oct 2021 \*/

#include<stdio.h>

#include<conio.h>

int main()

{

//Header

printf("\n\t Program to Find Average Of Marks Scored in 5 Subjects");

printf("\n\t \*\*\*\*\*

\*\*\*\*\*");

//Declaring variable

float s1,s2,s3,s4,s5,sum,avg;

//Prompt user for input

printf("\n\t Marks scored in 1st Subject :");

scanf("%f",&s1);

printf("\n\t Marks scored in 2nd Subject :");

scanf("%f",&s2);

printf("\n\t Marks scored in 3rd Subject :");

scanf("%f",&s3);

printf("\n\t Marks scored in 4th Subject :");

scanf("%f",&s4);

printf("\n\t Marks scored in 5th Subject :");

scanf("%f",&s5);

//Calculation Average

sum=s1+s2+s3+s4+s5;

avg=sum/5;

//Printing output

printf("\n\t Average of %8.2f,%8.2f,%8.2f,%8.2f,%8.2f =  
%8.2f",s1,s2,s3,s4,s5,avg);

}

OUTPUT :

## ASSIGNMENT – 1

```
Program to Find Average Of Marks Scored in 5 Subjects
*****
Marks scored in 1st Subject :10

Marks scored in 2nd Subject :20

Marks scored in 3rd Subject :30

Marks scored in 4th Subject :40

Marks scored in 5th Subject :50

Average of 10.00, 20.00, 30.00, 40.00, 50.00 = 30.00
```

Question6- To find the total purchase made on 4 different items purchased

Answer6- Program:

/\* Here is a program to find the total purchase made on 4 different items purchased

</> Naveen

Date : 21 oct 2021

\*/

#include<stdio.h>

#include<conio.h>

int main()

{

printf("\n\tHere is program to find the total purchase made on four different items purchased.");

printf("\n\t\*\*\*\*\*\n\t\*\*\*\*\*");

int i1,i2,i3,i4,sum;

printf("\n\tPrice of 1st item :");

scanf("%d",&i1);

printf("\n\tPrice of 2nd item :");

scanf("%d",&i2);

printf("\n\tPrice of 3rd item :");

scanf("%d",&i3);

printf("\n\tPrice of 4th item :");

scanf("%d",&i4);

sum=i1+i2+i3+i4;

printf("\n\tYour total purchase is : %d",sum);

}

OUTPUT :

## ASSIGNMENT – 1

```
Here is program to find the total purchase made on four different items purchased.
*****
Price of 1st item :20

Price of 2nd item :20

Price of 3rd item :10

Price of 4th item :20

Your total purchase is : 70
```

### Question7 – To find square of a number

Answer7- Program:

```
/* Here is program to find square of a number
```

```
</> Naveen
```

```
Date : 21oct2021
```

```
*/
```

```
#include<stdio.h>
```

```
#include<conio.h>
```

```
void main()
```

```
{
```

```
printf("\n\t This is a program to find square of a number");
```

```
printf("\n\t *****");
```

```
long long num, sq;
```

```
printf("\n\t Input the number you want to find square of :");
```

```
scanf("%lld",&num);
```

```
sq=num*num;
```

```
printf("\n\t Square of %lld is %lld ",num,sq);
```

```
}
```

### OUTPUT:

```
This is a program to find square of a number
*****
Input the number you want to find square of :5

Square of 5 is 25
```

### Question8- To find cube of a number

Answer8- Program :

```
/* Here is program to find square of a number
```

```
</> Naveen
```

```
Date : 21oct2021
```

```
*/
```

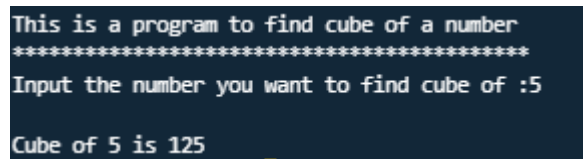

```
#include<stdio.h>
```

```
#include<conio.h>
```

## ASSIGNMENT – 1

```
void main()
{
    printf("\n\t This is a program to find cube of a number");
    printf("\n\t *****");
    long long num, cb;
    printf("\n\t Input the number you want to find cube of :");
    scanf("%lld",&num);
    cb=num*num*num;
    printf("\n\t Cube of %lld is %lld ",num,cb);
}
```

OUTPUT :

A screenshot of a terminal window showing the output of the first program. The text is as follows:

```
This is a program to find cube of a number
*****
Input the number you want to find cube of :5
Cube of 5 is 125
```

Question9 – To find square root of a number

Answer9- Program :

/\* Here is a program to find a square root of given number

</> Naveen

Date : 22 oct 2021

\*/

```
#include<stdio.h>
#include<conio.h>
#include<math.h>
```

```
int main()
{
    int num,sqrt;
    printf("\n\tThis is a program to find square root of a given number");
    printf("\n\t *****");
    printf("\n\t Enter the number : ");
    scanf("%d",&num);
    sqrt=sqrt(num);
    printf("\n\t Square root of %d is %d",num,sqrt);
}
```

OUTPUT :

## ASSIGNMENT – 1

```
This is a program to find square root of a given number
*****
Enter the number : 25

Square root of 25 is 5
```

### Question10 – To find Area of circle

Answer10 – Program :

/\* Here is a program to find the Area of circle

</> Naveen

Date 22oct 2021

\*/

#include<stdio.h>

#include<conio.h>

#define PI 3.14

int main()

{

float rad,area;

printf("\n\t This program is to find the area of circle");

printf("\n\t \*\*\*\*\*");

printf("\n\n\t Enter the radius of circle :");

scanf("%f",&rad);

area=PI\*rad\*rad;

printf("\n\t Here value of PI is %8.2f",PI);

printf("\n\t Area of circle having radius %8.2f is %8.2f",rad,area);

}

### OUTPUT :

```
This program is to find the area of circle
*****

Enter the radius of circle :3

Here value of PI is      3.14

Area of circle having radius    3.00 is    28.26
```

### Question11 – To find perimeter of a rectangle

Answer11 – Program :

/\* Here is a proram to find perimeter of rectangle

</> Naveen

Date : 22oct2021

\*/

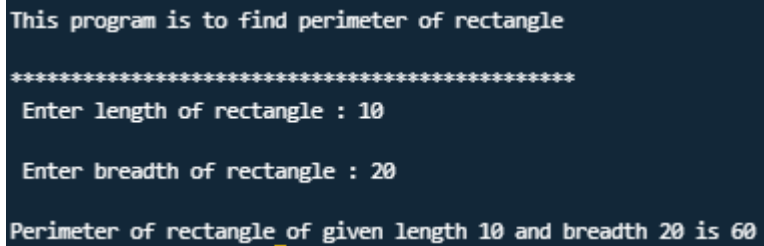

#include<stdio.h>

## ASSIGNMENT – 1

```
#include<conio.h>

int main()
{
    int ln,br,permtr;
    printf("\n\n\tThis program is to find perimeter of rectangle ");
    printf("\n\n\t*****");
    printf("\n\t Enter length of rectangle : ");
    scanf("%d",&ln);
    printf("\n\t Enter breadth of rectangle : ");
    scanf("%d",&br);
    permtr=2*(ln+br);
    printf("\n\tPerimeter of rectangle of given length %d and breadth %d is  
%d",ln,br,permtr);
}
```

OUTPUT :

A screenshot of a terminal window with a dark blue background and white text. The output shows the program's execution: it first displays 'This program is to find perimeter of rectangle', followed by a line of asterisks. Then it prompts 'Enter length of rectangle : 10' and 'Enter breadth of rectangle : 20'. Finally, it displays 'Perimeter of rectangle of given length 10 and breadth 20 is 60'.

```
This program is to find perimeter of rectangle
*****
Enter length of rectangle : 10
Enter breadth of rectangle : 20
Perimeter of rectangle of given length 10 and breadth 20 is 60
```

THANK YOU SO MUCH 😊
